Happy Clients

Take a look at what some of our recent clients have said.

The team are a pleasure to work with and felt like a true extension to our own team, and we would not hesitate to recommend them to anyone looking for a 'safe pair of hands' for their next event.

[Sandi Atkinson, Executive Officer The Mathematical Association](#)

Having the Event Works team on our side to organise the virtual event really made a difference to the event we delivered to our team, in particular in terms of the interactivity and engagement.

It helped our people to pay attention and feel involved during a 3-day event, while seated in front of their computer screens! They appreciated the balance between entertainment and useful information, which served our goal to re-energise the team at the beginning of the season.

[Elise Guérin, Marketing Lead EMEA, The Climate Corporation](#)

Just to echo from me a big thanks to all the Event works team. You did a great job and should be very proud of the role you played in getting this new type of event over the line!

Let me also say how great a job you did Sharon, Jayne & Rob; not just on what was asked of you – but mostly for the times you stepped up and connected things that were loose. You managed to operate through all the challenges.

Connected Data London/Knowledge Connexions

The Eventworks team were indispensable to Connected Data London, - it was great working with Sharon, Jayne & team - I'd have no hesitation in recommending them and look forward to working together again in future.

James Phare, Director, Neural Alpha

I have relied on Jayne and her team for many years now for event support ranging from dinners to press events to large conferences and European roadshows and Incentives both at RightNow and at Neo4j.

Jayne is a total pro, very reliable, always going the extra mile with ever changing requirements.

We see Jayne and her team as a real extension to our own team and it's a joy to know her by your side at your next big gig.

Claudia Remlinger, Senior Marketing Director EMEA, Neo4j
